Innovative Wireless 2D Imager

Features

Adaptus™ Imaging Technology - Hand Held Products' exclusive brand of imaging technology provides omnidirectional reading of linear, PDF417, and Matrix bar codes, plus image capture. All features are well suited to cordless applications where improved efficiency and ergonomics are primary goals.

Bluetooth® v1.2 Class 2 Radio - Developed to reduce interference in existing RF backbones, including 802.11. Only v1.2 uses Adaptive Frequency Hopping (AFH) to mitigate data collisions in the 2.4 GHz frequency band, while providing a 33 foot (10m) working range.

Unique Base Design offers the following features:

- *A minimal footprint that is up to 33% smaller than major competitors' products, simplifying installation and leaving more counter space for customer service or other application needs.*
- *Presentation scanning with a docked imager for efficient, hands-free bar code reading.*
- *Host-powered interface and RF link; an exclusive Hand Held Products feature that extends the mobile capabilities of the IT4620 by drawing power from a portable device for radio and host communications.*

Battery - A long lasting, high capacity lithium ion battery provides 57,000 scans per full charge with no conditioning required. The battery is field-replaceable.

Durable - Hand Held Products' solid state, no-moving-parts imager design withstands more than fifty 6 foot (1.8m) drops to concrete.

2005 Sunrise Compliant

Hand Held Products' IMAGETEAM 4620 (IT4620) combines exclusive Adaptus Imaging Technology with Bluetooth wireless connectivity to provide a truly unique and durable imager for retail and commercial cordless bar code reading.

In applications where operators must move about to read bar codes, cables become a limiting factor. They cause inefficiencies or safety and ergonomic concerns. Cable length often limits working range, resulting in an object being moved to the reader because the reader can't be taken to the object. With cordless bar code reading, operators have freedom of movement required to quickly, safely, and ergonomically read bar code data. With a 33 foot (10m) working range and Adaptus Imaging Technology, the IT4620 has the right combination of performance and features.

Having the right performance is only part of the solution; staying in service is just as important. The IT4620 also has class-leading durability. It was designed to survive in real world mobile applications. Hand Held Products is committed to creating some of the most rugged products available, and the IT4620 is another example of that commitment. With no moving parts and a robust housing design, the IT4620 will easily provide years of service in retail and commercial environments, creating a favorable total cost of ownership.
